REMARKS

GUARANTEE—We guarantee all Trees, Shrubs, Plants, Bulbs and Seeds that we send out to be true to name and to reach purchaser in good condition when forwarded by **Mail or Express** (freight shipments at purchaser's risk), and hold ourselves in readiness to replace all stock that may accidentally prove untrue to label, free of charge, or refund the amount paid therefore, but it is mutually understood and agreed between the purchaser and ourselves that our guarantee of genuineness shall not in any case make us liable for a greater sum than that originally received for such stock that may prove untrue. Most failures with plants, bulbs and seeds are due to soil conditions, unfavorable weather and other causes entirely beyond our control, rendering it impossible to guarantee success, and although we will take all possible care to send only such stock as will, under proper conditions, give satisfactory results, we do not and should not be expected to guarantee stock to grow, or guarantee results in any way, and we cannot entertain complaints that are not made promptly after receipt of goods.

METHODS OF PACKING AND FORWARDING ORDERS

In this catalogue all stock listed (unless noted) **CAN BE SENT** by mail. There are some items, however, that **SHOULD** be sent by express, and other items that, on account of size, **MUST** be sent by express. The packing and shipping therefore always use our best judgment in putting them up consistent with safe there are instances where local plantable to have orders sent by express so maining about the roots, still in a great where transportation charges are high, the larger sizes, and too large for in damp moss, and delivery of the transportation charges. Heretofore the limit of weight of a package of mailable plants, bulbs and seeds, has been four pounds. The newly established system of Parcel Post simply gives the added privilege of transferring through the mails packages of mailable plants, bulbs, seeds, etc., of weight up to eleven pounds. Do not construe this to mean, however, that the increased size of package allows carrying express size plants. It only permits of sending you larger orders of mailable plants.

IMPORTANT INFORMATION FOR CORRESPONDENTS AND CUSTOMERS

WE RESPECTFULLY CALL ATTENTION TO THE SUGGESTIONS ON THESE PAGES, WHICH, IF FOLLOWED, WILL AID IN THE PROMPT AND SATISFACTORY EXECUTION OF YOUR ORDERS

The Pleasure of Growing Roses

It has been said that Roses do not flourish in this country as they do in Europe. However true this may have been, it scarcely holds true today. With the many new Roses introduced into our country during the past two years, there are a large number of varieties which are well adapted to the different growing conditions in various sections, and the time is here when a very favorable comparison can be made between Roses growing in the North and Roses growing in the Southern States and California. Also between the results here and those of the "World's Famous Rose Growing Section of Europe."

There is every reason, therefore, for the planting of a Rose garden to be a most fascinating and interesting work. The winter planning, selection of the most adaptable varieties, sending the order, receiving and planting, watching the growth and development of flowers of the different varieties, is highly interesting.

Comparative Value of Roses Don't think any Rose too small to do well. The roots of the one-year plants being carefully protected in pots, permits of the shipping and successful planting of them anywhere. Roses of this size are to be recommended for all Rose growing sections. If you wish the largest and best Roses for better effect and more bloom, then Roses of the two-year size from pots are to be recommended.

There is another advantage in planting pot-grown Roses; namely, that they can be planted at any time of the year. The ball of earth contains all of the fine fibrous roots, and when the plants are shipped to the plant than if the Rose had simply been removed to a larger sized in a growing condition, can be planted at any time through the growing

Advantage of Pot-Grown Roses

transplanting can be done with no more injury to the roots do not have to establish themselves, as is the case with the dormant plants. This kind of a Rose, being in a growing condition, can be planted at any time through the growing season, and in this has many advantages.

Roses on Their Own Roots, Not Grafted

they are far preferable to budded Roses and much more satisfactory in every way. The Garden Roses of today are mostly the compounds of many types and species, and it is a fact that upon some varieties the foliage is so similar to that of the wild root growth that it is not readily detected by those who are not professional Rose growers. It follows, therefore, that only professional gardeners who thoroughly understand the science of budding and the growing of budded Roses should ever undertake the planting of budded Roses.

In consequence, everything gives way to suckers and sprouts of wild Roses. Own-root, pot-grown Roses never produce wild Roses. It is impossible for them to produce anything but the genuine variety. The most prominent Rose growers of today are growing Roses on their own roots.

Garden by McGregor's Guide

A valuable new book. A complete guide to successful growing. It contains a great deal of practical information, told in a clear, simple way, on the growing, care and management, in the house or garden, of many of the beautiful flowers offered. It tells all about Soil and Its Preparation, Treatment of Plants when received, Potting of Plants, Watering of Plants, Indoors and Out, Plants in the House in Winter, Propagating, Temperature, How, When and Where to Plant, Window Boxes, Hotbeds, Cold-frames, Pits, Sowing Seeds, etc., Fertilizers and Manures, Diseases of Plants, Insects, Protection During Winter. Price, 25 cents, postpaid; or free on request with an order amounting to \$2.00.

Springfield, Ohio, U. S. A.

Is headquarters in the United States for the growing and shipping of plants by mail and express, and is the greatest Rose producing center in the world. It is centrally located, geographically, with three express companies—American, Adams and Wells Fargo—which connect with all others, and has unequalled facilities for receiving and shipping orders.

Why We Can Save You Money

Our goods are grown in large quantities for wholesale purposes. Our retail prices are based on our large production, giving our retail customers an easily appreciated advantage. By adopting the plan, special offers and collections, and as our sales to you are by mail, we reduce our selling expense to a minimum.

PARCELS POST Heretofore the limit of weight of a package of mailable plants, bulbs and seeds has been four pounds. The newly established system of Parcels Post simply gives the added privilege of transferring through the mails packages of mailable plants, bulbs, seeds, etc., of weight up to eleven pounds. Do not construe this to mean, however, that the increased size of the package allows carrying express size plants. It only permits of sending you larger orders of mailable plants.

Special Express Rates From Springfield By reason of all Express Companies having offices at Springfield, and through special arrangements made with all companies, shipments to our customers are carried at a special rate, running to 25 and 33½ per cent less than for regular merchandise. As this is the largest shipping point for plants in the U. S., you are insured of special rates from Springfield.

Remittance With Order Please send sufficient money to cover your entire order. The safest way is by means of postoffice orders. If these are lost a duplicate can easily be obtained, and there is no danger of their being stolen, for no one can obtain money on them except the person to whom they are addressed. They can be obtained at all postoffices. The fee is but five cents for \$5.00 and under.

While we assume the risk of paper money enclosed and carefully sealed in our self-addressed envelopes, silver money, except in registered letters, is at the risk of the sender.

SHALL WE REMOVE SOIL FROM ROOTS AND SHIP EXPRESS PREPAID? Read these Conditions Carefully
If you wish us to ship by Express, Prepaid, with soil removed, you must give us instructions to do so

Removing the soil, or ball of earth, from the roots of the plants places the shipping of plants on a mail order basis, and inasmuch as we pay postage to all points of the United States and its possessions, we are willing to prepay the express charges on orders amounting to \$3.00 or more when shipped in this way, **except**, however, on orders for such plants as Cycas, Palms, Ficus, Azaleas, Araucarias, Camellias, Rhododendrons, Banana Plants, large Lemons or other large decorative plants; Dahlias, Caladiums, Peonies, large Shrubs, Nursery Stock, or vegetable seeds in pints and quarts, and garden requisites. Such plants as these must be shipped without the roots being disturbed if one must expect the best results from them. The prepay offer does apply, however, on such plants as Roses, Begonias, Chrysanthemums, Carnations, Cannas, and ornamental Ferns, Geraniums, Fuchsias, Lilies, mailing size Shrubs, hardy vines, some of the hardy perennials and miscellaneous bedding plants. These plants can be shipped to the most far away sections of our country with the soil removed, and transplanted safely.

Our Prices will compare favorably, we believe, with those of any responsible firm in the United States. We guarantee our seeds to give satisfaction and every shipment is sent out under our guarantee of safe delivery.

Plants by Mail All stock listed in our Catalogue, unless noted, is offered at prices marked, by mail, postpaid, and we deliver all such items free of all expense to any postoffice in the United States.

Postage Stamps These can be sent for fractional parts of one dollar or where postoffice orders cannot be had, provided two cents in stamps extra are sent with every remittance. None but stamps in perfect order accepted.

Foreign Orders Ten per cent extra should be added to all Foreign Orders for Roses, Plants, Bulbs, Seeds, etc., U. S. A. or its possessions. This additional amount is needed to cover the cost of extra postage and packing on long distance shipments. Payments are preferred by Money Orders. Many countries receive goods through Parcel Post from U. S. A. and most postoffices throughout Mexico receive packages by mail up to and including 11 pounds each in weight.

If You Wish Orders Held Be sure to say so, then we can book your order (and set items aside for you if necessary) until proper time to ship; otherwise we will assume the order is wanted at once.

Our Nursery Department is separate and distinct from our greenhouse, and it is necessary, therefore, that all items selected from this department, and from pages 117-119, inclusive, be shipped direct from our Nursery under separate transportation charges.

Errors and Complaints We exercise the utmost care in filling orders, striving to do a little more than we offer, yet in the press of business errors sometimes occur, and when orders are received that are in any way damaged or unsatisfactory, we wish to be promptly notified of the fact, and will make such an adjustment of your claims as will be satisfactory.

Fall Catalogue of imported bulbs, plants and seeds for fall planting and winter bloom will be ready about September 1, and will be sent to all our patrons this year without request; to others free on application. If not received promptly, a postal card will bring it.

Do not fail to state whether to ship by mail or express, If by express please name company.

THE WONDERFUL HARDY
EVERBLOOMING PORCH ROSE

Climbing American Beauty

See illustration in colors, on front page of cover.

The Climbing American Beauty is the result of a cross between an unnamed seedling and the grand old American Beauty. The parentage of this unnamed seedling was Marion Dinglee crossed on Wichuriana. The resulting flower was single, about three inches in diameter and a light pink in color. This seedling was selected because it is perfectly hardy, has a fine foliage that does not burn with the sun, and its thick glossy leaves keep on the bush all summer, which gives it a pleasing appearance—quite a contrast to the brown and dead leaves of the Crimson Rambler and others of its type. The Climbing American Beauty is not an ordinary climbing rose, but is a vigorous rampant, climbing type of the real American Beauty, with its gorgeous flowers and its surpassing fragrance. Immense blooms measuring three to four inches in diameter; and each one is invariably produced on a separate stem. The color is glowing crimson-red, the real American Beauty color. The foliage is magnificent and is an important feature in climbing roses, for without healthy, leathery foliage, any climbing rose is a failure, because it is unsightly. This beautiful rose is absolutely hardy in all localities, withstanding a temperature of 10 to 25 degrees below zero, and is equally satisfactory in warmer southern climates. Price, nice strong 1-year-old plants, 25c each, 3 for 65c, ppd.; 2-year plants, 50c each, 3 for \$1.30.

FREE OFFER 5B41—If you will send us an order amounting to \$1.00 from a friend or neighbor who is not now a customer of ours, we will send you the beautiful Rose, Climbing American Beauty, free and postpaid. If the order from a new customer amounts to \$2.50 we will send the 6 Climbing Roses illustrated on the back of our cover, postpaid.

The collection shows wonderful results achieved by the most noted rose specialists of this country and Europe. Attractive Bedding Designs for the Lawn

See illustration in colors, plate opposite page 40

The wonderful popularity of summer bedding, or outdoor design planting, for general effect prompts us to offer some special collections for this purpose, and illustrations are given in color to give some idea of resulting effects as well as to give suggestions for planting. The chief merit of bedding is the resulting attractiveness and brightness which completes the picture of the home grounds, and such form of planting is probably the most least expensive of all for the results secured.

For description and price see page 40.

McGregor's Choice Large Flowering Geraniums

Fancy Carnations and Japanese Chrysanthemums

See illustration in colors inside back cover

When the people throughout the country were vainly seeking for an appropriate flower acceptable to all, as our National Emblem, nature opportunely came to their assistance by presenting the improved Carnation—the product American soil—which seems especially created for that purpose, uniting the red and white flower with foliage of metallic hue. While it is generally conceded that the Rose ranks first for producing flowers for cutting, the Carnation is gaining in popularity for its profusion of bloom, and for the exquisite fragrance of the flowers.

Chrysanthemums have come to be known as the "Queen of Autumn Flowers," and well they deserve it. For massive blooms, grandeur of colors, ease of culture and certainty to flower, either in the open ground or in pots, there are no plants that will surpass them. On color plate inside back of cover, we show in natural colors, ten of the finest Chrysanthemums that we have been able to get together. They are the product of American soil which seems especially suited for their development. For massive blooms, grandeur of color, ease of culture, etc., there is nothing that will surpass them, and there are but few plants their equal. The endeavor of nearly all growers in late years has been to introduce varieties which will produce the largest and finest blooms for exhibition purposes, and it is from these new Carnations and Chrysanthemums that we get our finest cut-flowers.

The following varieties make up a selected list which will undoubtedly prove satisfactory in every way.

The New Wichuriana Rose, Wichmoss, 30c

The best bloomers for the yard and garden are included in these newer roses of all kinds. Those offered are of unusual value. Just as rose growers in America have come to recognize the essentials that must be present in a novelty, so in Europe these same characteristics are being bred into the seedling, and it is with confidence that we recommend the following magnificent varieties. Roses listed here are not untried, having passed the most severe tests, and are offered as gold medal varieties.

The Newest Outflower Rose

Hadley

Hadley is a development from a line of seedlings raised by Alex. Montgomery, Jr., the varieties being used in this development being Liberty, General McArthur and Richmond. In color it is a deep velvety crimson, retaining its brilliancy at all seasons of the year. The variety is double and buds are well formed. The fragrance is excelled only by American Beauty.

The Most Beautiful Rose of the Century

General McArthur

"As Fragrant as a Rose Can Be"

General McArthur is a Hybrid Tea Rose, as fragrant as a rose can be; has good sized flowers and blooms continuously. The bud, when first opening, is the brightest crimson-scarlet and the flower retains this perfect coloring until it drops its petals. Blooms continuously the whole season through and gives fine stems for cutting. Its habit of growth is remarkably good, making strong, shapely plants that may be depended on for large flower shoots. It will stand the winters any place south of the Ohio River, but north of that line it should be protected. Price, nice strong 1-yr. plants 15c ea, 3 for 40c; 2-yr. plants, 30c ea, 3 for 85c, ppd.

Madameoiselle Blanche Martignot

Like so many of the good continental roses, we just happened to have the good luck to run onto this superior rose by chance. Why it has been neglected so long is beyond our comprehension. The only solution to the question, "lost in the shuffle," is probably the appropriate answer. Growth free, and the foliage is quite distinct, both in shape and color. The bud is extremely long and pointed. It has a distinct light silvery color. The flowers are beautiful peach-pink, with tints of yellow and crimson, the same colors as seen in the Aurora Borealis. Price, strong 1-yr.-old plants, 20c each, 3 for 50c, ppd; 2-yr. plants, 40c each, 3 for \$1.10, ppd.

Mrs. A. R. Waddell

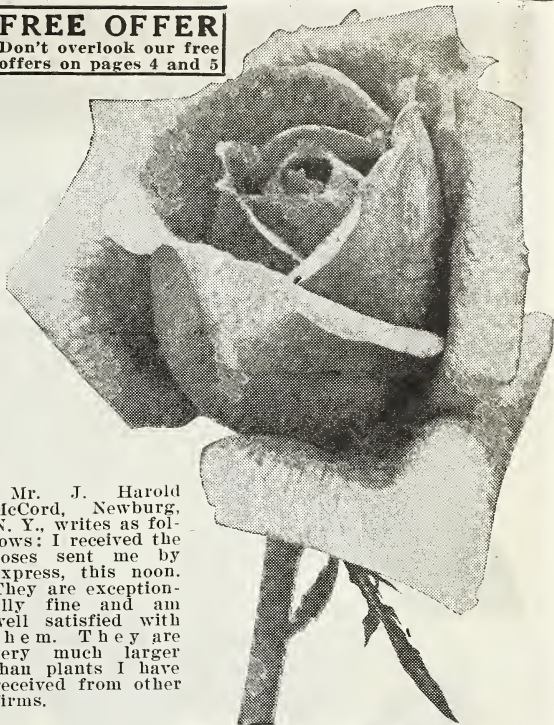

This is one of the most beautiful Hybrid Tea Roses in bud and flower of any grown. The flowers are of the largest size, of perfect form, and possess wonderful keeping qualities. Price, strong 1-yr.-old plants 20c each, 3 for 50c; 2-yr.-old plants, 40c each, 3 for \$1.10.

Perle Des Jardins

Few roses have as firm a hold in popular favor and are so highly prized by the professional and amateur rose growers alike as the Perle des Jardins. It is not only admirably adapted for forcing, but thrives well in the open air, blooming freely in either case. Its large, full, well-formed, golden-yellow flowers, borne on stiff stems, make this variety especially desirable for bouquets and artistic floral decorations, while the dark and glaucous foliage of the plant furnishes an excellent setting for the fragrant, delicate hued blossoms. Hardy south. 1-yr. plants, 15c, 2-yr., 30c.

McGREGOR'S CHOICE MONTHLY BLOOMING GARDEN ROSES

The Rose of Many Colors, Helene Cambier

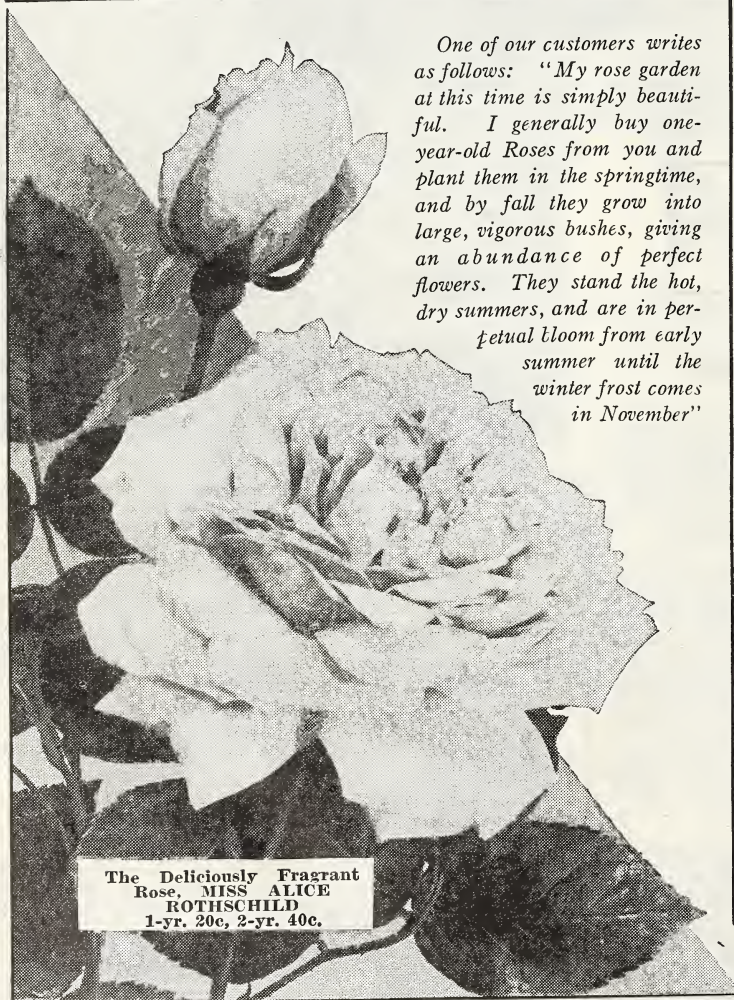

It is a new Rose of French origin, destined, we believe, to find a prominent place among the highest grade ever-blooming Roses, both for summer and winter-blooming. The growth is free and vigorous, very free-blooming, flowers of splendid substance and a delightful shade of deep, rich golden-yellow. In extreme heat comes a deep amber color. The buds are full and firm, lasting a long time when cut. As the flowers expand, the center of the Rose discloses depths of golden-yellow, with light orange tints, while the older petals lessen to lemon-yellow, giving a combination of tints and tones unequaled in their beauty. 20c each, 3 for 50c; 2-year-old plants, 35c each, 3 for \$1.00.

The Apricot Yellow Rose, Melody

The color is new and almost indescribable, being a lovely shade of deep yellow shading to apricot in the center. It is one of the most showy yellow roses we have ever seen. It has a form perfect in contour and is very full and double. The plant is extra strong, hardy and vigorous in growth, clothed with handsome, rich, glossy foliage. Ours is the true stock, which is scarce. Early orders only can secure it. Strong 1-year plants, 20c each, 3 for 50c, postpaid; strong 2-year plants, 50c each, 3 for \$1.25.

The Famous Yellow Rose

Marechal Niel

The fame of the superb yellow Rose Marechal Niel, with its large, deep, golden-yellow flowers, is world-wide. It is almost universally held to be the finest Rose for indoors or outdoors, where the climate admits of its cultivation. In the north the plant should have careful protection in open ground during the winter. Its magnificent golden-yellow flowers are almost massive in dimensions, and reports from Southern California growers tell of single plants showing one to two thousand blooms at a time. As many as four hundred perfect blossoms have been taken from a single plant within a couple of months. All in all it is one grand rose. It is of strong growth and beautiful foliage. It is grand in petal, shape, color, fragrance, lasting qualities and size, an extremely free bloomer and flowers throughout the season. Contrary to many roses, which lose their color after opening, Marechal Niel decidedly improves and takes a deeper yellow after being kept for a day or two. The tea fragrance is strongly present in this rose. It is a variety which practically stands by itself. Price, strong 1-year plants, own roots, 15c each, 6 for 85c, 12 for \$1.50, postpaid; nice 2-year plants, 25c each, 6 for \$1.35, 12 for \$2.65; extra large pot-grown, on their own roots, at 50c and 75c.

HYBRID PERPETUAL OR JUNE ROSES

FRAU
KARL
DRUSCHKI
(HARDY)

(June Roses.) There is little question that June Roses are the most valuable of all hardy plants. They are of vigorous, upright growth, have large, bold flowers, frequently measuring 5 to 6 inches in diameter, and are deliciously fragrant. These roses will succeed in any locality and are so hardy that they will live through the severest winters with but a light protection of leaves or coarse manure. In shapeliness, color, fragrance, form, grace and beauty the Hybrid Perpetual Roses have no rivals among roses. They are the roses for the amateur and for the professional growers; growing anywhere with little care and any soil, and giving the most wonderful blooms.

Snow White Hardy Rose Frau Karl Druschki

(White American Beauty.) This magnificent variety has taken first prize at all the great flower shows of Europe. Makes splendid buds and immense flowers four to five inches across; perfectly double and delightfully fragrant; large, thick petals, very durable and handsome. Bright, shining green leaves, elegantly veined; a healthy, vigorous grower, entirely hardy, and a constant and abundant bloomer. Recommended as the most beautiful and satisfactory snow-white hardy perpetual Rose. Price, 1-year plants, 20c each; 3 for 50c, ppd; 2-year size, 40c; 4 for \$1.50.

Madam Chas. Wood

A vigorous, healthy Rose, of dwarf, branching habit, and is simply loaded with flowers all summer long, being even more profuse than most of the tender 'ever-blooming' Roses. The flowers are large, perfectly double, and of a dazzling scarlet-crimson color, and have the rich, spicy fragrance peculiar to the best Hybrid Roses." Price, 20c each; 3 for 50c; large 2-year-old plants, 40c ea.; 3 for \$1.

Paul Neyron

Paul Neyron enjoys the distinction of producing the largest of roses. The plant blossoms two or three times a year. The color is clear pink, shading to rose—most beautiful in the massiveness of the blossom. Very fragrant with mild touch of apple blossoms. The rose is very strong and vigorous and is considered by rose growers as being among the first six Roses of the world best suited for outdoor planting. Price, 15c each, 3 for 40c; large 2-year-old plants, 35c each, 3 for \$1.00.

New Hardy Rose

Gloire de Lyonnaise

This grand Rose is the nearest yellow Hybrid Perpetual we have. It can not be called deep yellow, but rather a pale shade of chamois or salmon-yellow, deepest at center, sometimes passing to a rich, creamy-white, finely tinted orange and fawn. The flowers have all the beauty of Tea Roses, are large, full and delightfully sweet. This we consider one of the very best Roses we have ever seen. It will be sure to delight you. Price, 20c each; 3 for 50c; large 2-year-old plants, 40c each; 3 for \$1.00.

The Hardy June Rose

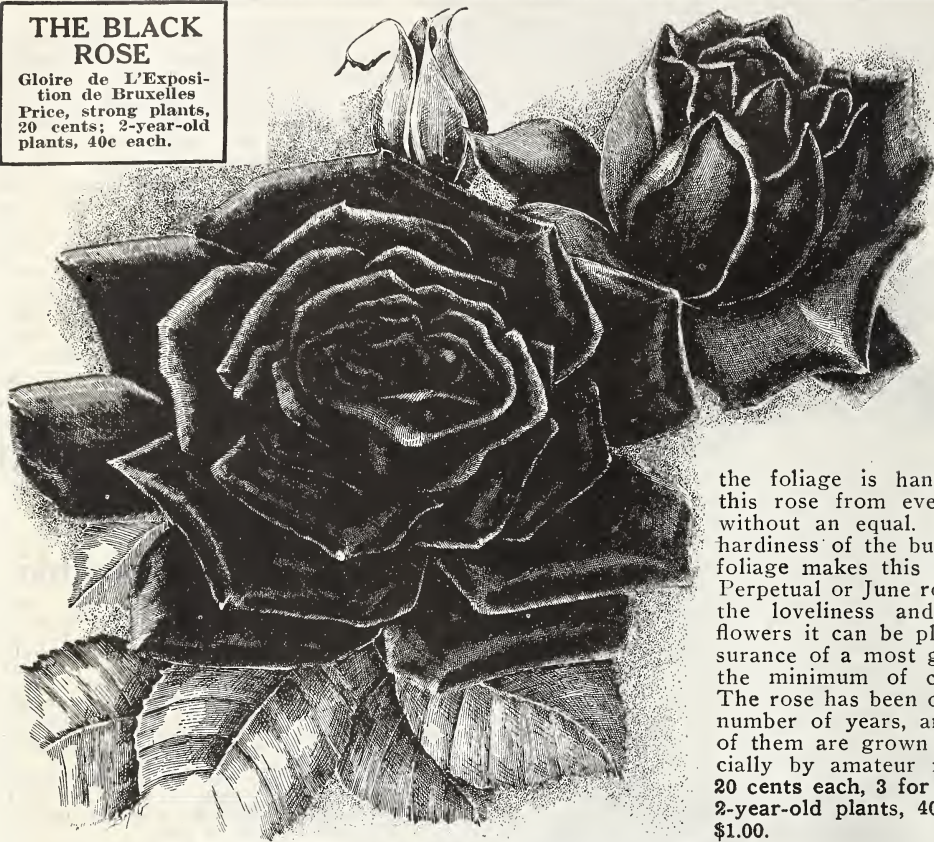

King George V

This Rose has a very large full flower, opening freely; beautifully shaped; much resembling Madame Jules Graveaux, in build of flower and petals. The color is a rich blackish crimson, with deep velvety violet flush, a striking and brilliant color, not burning in the sun or turning blue as so many of our dark roses do. It is very free flowering and perpetual and delights in warm sun. It has a very strong and fragrant perfume. Has been awarded several gold medals. Price, strong 1-yr.-old plants, 30c ea., 3 for 85c, ppd.; 2-yr.-old plants, 60c ea., 3 for \$1.75, ppd.

FIVE NEAREST BLACK HARDY ROSES

THE BLACK ROSE

Gloire de L'Exposition de Bruxelles
Price, strong plants, 20 cents; 2-year-old plants, 40c each.

Gloire de L'Exposition de Bruxelles

A velvety crimson rose, with fiery center, conspicuous in any garden, and is considered the largest, sweetest and best of all hardy roses. The blooms come very freely and are very large and full. The bush grows lustily, erect and big, and the foliage is handsome. Sizing up this rose from every point it stands without an equal. The extraordinary hardiness of the bush and its splendid Perpetual or June roses and aside from the loveliness and fragrance of its flowers it can be planted with full assurance of a most generous return for the minimum of care and attention. The rose has been on the market for a number of years, and more and more of them are grown each season, especially by amateur rose-lovers. Price, 20 cents each, 3 for 50 cents, postpaid; 2-year-old plants, 40 cents each, 3 for \$1.00.

Souvenir de Charles Montault

A plant of moderate stature, but one that begins to bloom when very young; the stems are fairly large. In color this rose is fiery scarlet passing to rosy crimson with a maroon shade. The fragrance is delightfully sweet and lasts a long time. The flowers are large and full. A rose that should be in every garden. Price 15 cents each, 3 for 40 cents; large two-year-old plants, 40 cents each, 3 for \$1.10.

Marie Bauman

A crimson-vermilion rose, suffused with carmine, as exquisite a blossom as can be found among the roses. The fragrance is delightful and earnest. The plant blooms profusely, with large, full blossoms of high quality. The bush attains moderate size, and the wood is freely covered with thorns that are light red in color. This is one of the roses which rose lovers should not overlook. One of the best dark red roses we know of. Price 15 cents each, 3 for 40 cents, postpaid; two-year-old plants 35 cents each; 3 for \$1.00.

Black Prince

This rose has been shown before different Horticultural Societies and each time it has carried off the medal for being one of the finest roses of its class. It has been judged by experts and rose lovers. In color it varies from a flashing red and darker to crimson. There is a strong, lasting, rosy fragrance that increases with age. The flowers are borne freely, large, full and of the most delicate fabric. The plant grows rapidly and compact and makes friends whenever given a chance to display the many admirable qualities. Price 20 cents each, 3 for 50 cents, postpaid; 2 year size 40 cents each, 3 for \$1.00.

Prince Camille de Rohan

Prince Camille de Rohan is one of the darkest of the roses—blood-red and maroon. The buds and half-opened flowers are darker than the full blown blossoms, the latter assuming a smoky crimson hue as the petals droop. The fragrance is strong but decidedly pleasant. The plant grows vigorously, with spreading formation and good foliage. It blossoms more freely in the early summer than toward fall. Because of its deep color and the plush-like fabric of the blossoms, the Prince Camille de Rohan is a favorite with many rose lovers. The richness of color alone would make this variety a desirable subject even if there were no virtues. Price 15 cents each, three for 40 cents; two-year plants 35 cents each, 3 for \$1.00.

HARDY YELLOW ROSES THAT GROW ANYWHERE

Orange Yellow Rose Soliel D'Or

The flowers of Soliel d'Or make up a wonderful combination of reddish gold, orange yellow, nasturtium red and opaline pink. In a general way the color would be described as rich chrome yellow, shade coppery rose. The expanded flower is perfectly double, the petals slightly incurved and fully expanded blooms measure three inches or more across. It bears some likeness to the briar type and the foliage is heavy, dense and deep green. The variety is of vigorous growth, growing three to four feet high, branching well and bears quantities of exceptional highly colored flowers as its name implies and when in full bloom is of striking brilliance, and is a variety that should be a part of every garden collection.

Extra strong 2-yr. plants
50c, 3 for \$1.25.

Our illustration shows the beautiful orange yellow hardy rose, Soliel d'Or.

Clear Yellow Rose Harrison's Yellow

A rose that has been known since we were children is the Yellow Harrison. Color can only be described as being of the purest and clearest yellow. The flowers are semi-double, of medium size, and of pleasing fragrance. The flowers come full in early June and there is no other rose which bears blooms in greater abundance. The variety grows to a height of four or five feet, is of the briar type and is supposed to be a hybrid between the Austrian and Scotch roses, although it flowers more freely than either of its parents. It is a variety as hardy as shrubbery, will grow anywhere and will always take care of itself. It should not be pruned in the fall as the flowers are borne on young shoots from the old wood. Pruning should be done immediately after the blooming season.

Extra strong 2-yr. plants
50c, 3 for \$1.25.

Pelargonium Easter Greeting

EASTER GREETING—This new, ever-blooming Pelargonium was shown at Mannheim Horticultural Show, planted out as a bedding plant and bloomed continually until late in the fall. Rivals the Azalea in beauty. The following description is from the German introducer, Carl Fraiss: "Easter Greeting is the most wonderful flowering variety of all Pelargoniums. Its blooming season extends from late winter to early fall, and through the summer the plants are gorgeous. The plants in 5-inch pots have produced over a hundred trusses of blooms. The variety is of strong, compact, bushy habit, holding its foliage well. The color is hard to describe—a fiery amaranth red. Some describe it as a brilliant rose. Each of the five petals being marked with a large dark brown or black spot in the center, the spot being bordered with scarlet daintily penciled with crimson. The combination is very striking and at once catches the eye of the most careless observer. The florets are very large, from 2¼ to 3¼ inches in diameter and are very durable either on the plant or when cut." Price, 25c each, 3 for 65c, 6 for \$1.20, \$2.25 per dozen.

**Kentia

The Kentia Palm

Absolutely the Best House Palm Grown

Under the natural order of Palms, we find the finest of decorative, as well as many of the most useful plants known. In ancient history, no plant or tree is spoken of so much as the Palm, and today as a highly ornamental and wonderfully useful plant it stands without a rival. Their symmetrical, well-branched trunks, producing a spreading canopy of cut-leaved or fan-like foliage, distinguish them from nearly all other forms of vegetation. All members of this family are essentially tropical in their habits, are highly ornamental in appearance, and many of them in different ways of commercial value. The beautiful Kentia Palm of the Pacific Islands stands in the same relationship as the Royal Palm of Cuba. The Kentia is a native of the Lord Howe Islands, situated a few hundred miles east of Sidney, N. S. Wales. Here they grow in luxuriance on the mountain slopes. The horticultural world will quickly acknowledge the superiority of this wonderful palm. It has the grace and lightness of the beautiful Cocos Weddeliana, but is much more robust in growth with ten times the foliage. The plant forms graceful, recurved and spreading foliage from the ground up. The foliage of Palms is of two kinds—fan-veined leaves, in which the venation radiates from a common center, and the feather-veined, in which the veins run out from the sides of a long mid-rib. Phoenix Roebelini is of the latter type, as our illustration shows. This new variety is one of the easiest of all plants to manage, and if given proper treatment will make a rapid growth, small plants soon growing into specimens like our illustration, notwithstanding the fact that all Palms are generally called very slow growing plants. As a foliage plant, it cannot be excelled, withstanding wonderfully dust, changes in atmosphere and neglect. Do not expect any Palm, however, to take care of itself, as it should have regular attention. The leaflet offered below will give you full instructions.

We offer a fine lot of plants of this beautiful Kentia Palm as follows: Nice young plants, 50c and 75c each. Larger specimens, \$1.25, \$2.50 and \$3.00 each. All Palms should be shipped with soil on roots and by express.

BEAUTIFUL DECORATIVE FERNS

THE BEST FOR HOME AND PORCH DECORATIONS

These beautiful plants for home decoration vie with the Rubber plants for first place in the esteem of flower lovers. They are finely cut and oddly shaped. Fronds have a graceful effect produced by few other plants and they do exceedingly well in the parlor and conservatory. The Nephrolepis family, of which the well-known Boston is a member, has furnished us many beautiful species of late years.

The Most Notable and Valuable Novelty Introduced in Many Years

THE BEAUTIFUL OSTRICH PLUME FERN (Elegantissima Improved)

Probably never in the history of horticulture has a plant been introduced that has received the universal admiration and praise that has been accorded this rare novelty. The Ostrich Plume Fern has had the most phenomenal sale of any decorative plant that has ever been grown. This new variety is so far ahead of the Boston Fern that there is positively no comparison to be made. The character of its fronds is actually shown in the accompanying illustration, which is from a photograph and therefore a true picture. The fronds grow very broad and heavy, often measuring six inches or more across, and five or six feet long. The plant assumes an exceedingly massive yet graceful appearance. The divided pinnae or miniature fronds which are so gracefully arranged, keep growing constantly.

It is wonderfully valuable, not only on account of its beauty, but also on account of its ease in culture, hardiness and general adaptability. It has all the freegrowing, hardy characteristics of the Boston Fern, and, like that plant, is equally suitable for the home culture and a much more beautiful plant for greenhouse and conservatory decoration. The most valuable novelty that has been introduced in many years, in the New Plume Decorative Ferns.

The McGregor Bros. Co., Springfield, Ohio, U. S. A.
—Received Ferns today. I have dealt with every reputable Florist in the United States, but I have never received such splendid, large, thrifty plants packed in such excellent shape.
Mrs. W. H. Townsend,

Azusa, California

We offer well established plants at 20c each, 3 for 50c, postpaid.; strong plants, 30c each, 3 for 80c, postpaid, larger plants 40c each, 3 for \$1.10 postpaid; extra strong plants, 50c each,) for \$1.25. Specimen plants 75c each, 3 for \$2.00. (The largest sizes of these Decorative Ferns should be sent by express.)

The Boston Fern, 15c

The Boston Fern

—This popular Fern has proven a most valuable decorative plant. It is rapid growing, of very easy culture, soon forming a large, graceful plant; its beautiful fronds often attain a length of 5 to 6 feet, which arch and droop gracefully. No plant ever introduced has been more popular than the "Boston Fern." Price, nice young plants, 15c each; larger plants, 25c and 50c each, postpaid.

The New Fern Roosevelt

In general characteristics it resembles the Boston Fern, but with two points of great excellence over that variety. First, it produces many more fronds, making it a bushier and handsomer plant; then the pinnae are undulated, giving it a pronounced wavy effect seen in no other Fern. It is highly recommended. Fine young plants, 20c and 35c; stronger plants, 50c, ppd.; strong specimen plants, 75c each, by express only.

Roosevelt Fern, 20c, 35c, 50c and 75c

SPECIAL OFFER No. 5B491—We will send postpaid six Ferns which we will select from this and the preceding page, in the small sizes, for 85c postpaid; and the same number (six in all) of the larger size for \$2.00. (Should be sent by express.)

Hardy Ferns for Shady Places

These graceful and universally

Hardy Fern, 25c, 6 varieties for \$1.35

popular plants are of easy culture and afford a wide range of possibilities. A place where the soil is moist and the drainage good, will prove an ideal location, especially if a liberal amount of leaf mold or woods earth is available; and better still if rocks and stumps may unite in breaking the monotony of the ground's surface. Under such conditions Ferns require very little attention and amply repay in satisfaction and genuine pleasure. There are many places more or less shut out from the sunlight that may be converted into veritable beauty spots by clumps of Ferns of various kinds, and their intrinsic ornamental qualities are well worthy of our attention. 25c ea., 3 for 70c, 6 for \$1.35, \$2.50 per doz., by express only.

The Beautiful Fern Whitmanii

The graceful plumes and charm of the Whitmanii, its characteristic features of shape, size and growth, give it distinction and superior value. The Whitmanii is of dwarf growth and wide upright, stocky shape. The fine cut fluffy fronds stand erect. Each frond or branch has a double row of perfect little fronds set at right angles to the mid-rib. They are graceful beyond description, feathery, plummy; nothing describes them better than "Ostrich Plumes." Price, 15c ea., ppd; larger plants, 25c and 35c ea, ppd.; stronger plants, 50c.

Scotti Fern, 15c, 25c and 50c

The Parlor Fern Scotti

(Scotti.) It is a condensed form of the Boston Fern with characteristics not evident in the parent, an average plant in an 8-inch pot having 200 fronds. The fronds average about 20 inches and 3 inches in width at the widest point, being more finished than the parent. Price, nice young plants, 15c each; larger size, 25c and 50c.

The Plumed Scotti Fern Scholzeli

The ideal plumed Fern, holding the same position to all other plumed varieties that Scotti holds to the Boston. It is a sport from Scotti, possessing all of the merits of that most popular variety, but with the pinnae subdivided, giving it an airy, feathery appearance.

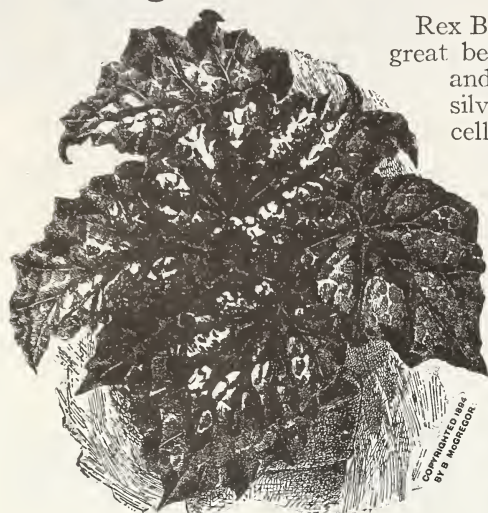

Price, nicely shaped plants 15c; larger sizes 30 and 75c, postpaid

Large Leaved Rex or Painted Leaf Begonias

Louise Closson, 20c

Rex Begonias are grown exclusively for the great beauty of their foliage, which is large and beautifully variegated, a peculiar silvery-metallic gloss. They make excellent pot plants, and are also effective for bedding in shady corners. We make a specialty of this marvelous family of plants. They require light soil compound of rich loam, loose woods earth and sharp sand. They like a moist, warm atmosphere, and should be kept shaded during the summer. Do not allow the sun to strike the leaves when wet, and do not overwater the plants.

The Fancy Rex Beg. Louise Closson

One of the richest and most beautiful of the Rex family. The coloring is simply magnificent, center of leaf deep bronze with broad band of silvery-rose, edged bronze, giving the whole a purplish tint. The oddest color of all the Rex. Price, 20 cents each; 3 for 50 cents; 6 for 90 cents; 12 for \$1.75.

Rex Beg. Mikado

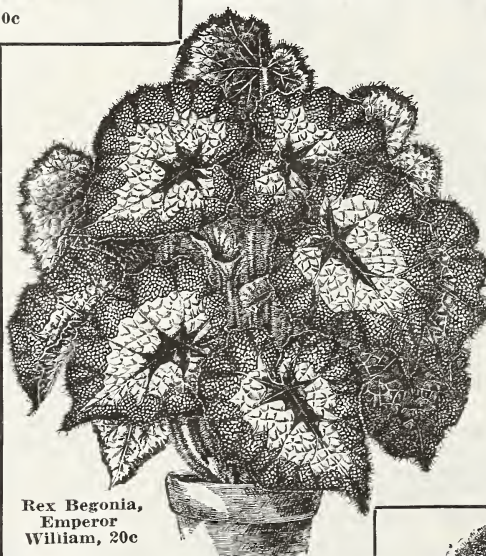

One of the freest growing Rex Begonias, throwing out great clusters of leaves which are exquisitely beautiful. They are edged with a narrow band of dull soft pink, especially prominent in the older leaves, which also have a pinkish cast. The body of the leaf is of a metallic-green with a dark center. The difference in this Begonia lies in the striking pinkish cast of the leaf. Price, 20c each; three for 50c; 6 for 90c; 12 for \$1.75, postpaid.

Rex Begonia The Queen

A very odd as well as pretty Rex. The habit and freedom of growth exceptionally good. The center and outer edge are a deep olive green, divided by a pretty band of pea green. The metallic luster is very bright. Price, 20 cents each; 3 for 50 cents; 6 for 90 cents; 12 for \$1.75.

Rex Begonia Lesoudsii

This is the finest and largest of any of the Rex family. It is impossible to describe in words the beautiful markings of this magnificent Begonia. It is a cross between Begonia Diadema and a Rex variety, but retains in a marked degree the Rex character. We consider this the finest of all the Rex family, both in size of leaf and rich coloring. INDIA RUBBER PLANT

(Ficus Elastica)

Ficus Elastica—Rubber Plant,
40c, 50c, 75.

Ficus Elastica, better known all over the country as the rubber plant, is undoubtedly one of the most popular and satisfactory house plants that has ever been distributed. The plant is of tropical nature, being at its best under moist conditions and high temperature, but if well cared for, the foliage kept clean, good drainage provided, and the soil kept sufficiently moist, it will continue growing throughout the year. Branched plants are produced by simply cutting out the top, which should be done in the early spring. The Rubber Plant does not require more than what might be termed good garden soil. Its wonderful thick leathery leaves enable it to stand excessive heat and dryness, while its deep, glossy green foliage always presents a showy appearance. It is particu-

larly adapted to house culture and for porch decoration. Price, 40 cents. Larger plants by express, 50 cents and 75 cents.

CYCAS REVOLUTA

The heavy, glossy deep green fronds resist alike the gas, dust and changes of temperature to which house plants are frequently exposed. Must be sent by express, too large to mail. Price, nice, small, shapely plants, 75c; 6 to 8 leaves, \$1 each; 8 to 10 leaves, \$1.50; 10 to 12 leaves, \$2.00.

ASPARAGUS SPRENGERII (Basket Fern)

(Trailing Basket Fern.)

When introduced, at a high price, this plant was received with some hesitation as to its desirability, but after only a limited trial it has come forward with such prominence that the supply will be inadequate to the demand for some time to come. Not only is it useful for cutting in sprays for fine cut-flower work, more particularly in connection with large Roses, etc., but grown in suspended pots, it makes one of the prettiest decorative house plants we know of. Used in decorations, as, for example, in the decorations of mantels, nothing can equal it. It is also a handsome plant for ferneries and hanging baskets. SUMMER FLOWERING BULBS

McGregor's Mammoth Lily of the Valley

The sweetest and loveliest spring blooming plant, producing delightfully fragrant blooms. Will thrive in any common soil and do well in shady places where many other plants fail. The plants are too often starved and neglected and relegated to some poor, out-of-the-way corner; but this popular and fragrant subject, like most other plants, repays for being well treated; and if the bed is given a liberal top-dressing of well decayed manure, along in February or March, it will show the effect by increased size, number and vigor of the flowers. We offer strong plants especially suited for outdoor planting, which should be done as early in the season as possible. Price, 5c each, 6 for 25c, 50c per dozen, \$3.50 per hundred.

McGREGOR'S SELECTED FLOWER SEEDS

We have used the greatest care in obtaining our Flower Seed, and those we offer are absolutely fresh, being grown under our personal supervision or imported from the best foreign seed growers. Failure in getting satisfactory results from seeds planted may be attributed to the manner in which the seed is sown rather than the lack of germinating power in seed, and seedsmen are unjustly censured when the fault lies in the cultivator and not in the seed.

Sowing of Seeds—Spade the soil in the seed bed to a good depth, work it over and over with the spade in order to mash the small clods. Sow the seed in drills or broadcast, according to the kinds, covering carefully and lightly, there being more danger in covering too much than not enough. Never allow the seed to remain in dry soil.

For seeds that require an early start, to secure blooms before frost, sow in shallow wooden boxes, in good garden soil. Cover seeds very lightly, keeping the box in a sunny window, covering the box with a pane of glass until the seeds begin to sprout, but never allow the soil to become too dry.

Transplanting of Seedlings—Do not allow the little plants started in the boxes to grow too tall before transplanting. Care should be taken in watering seedlings well after planting and to protect from the sun for a few days with light paper.

Flowers from seed are usually known as annuals, biennials and perennials.

Annuals bloom and ripen seed the first year, and then perish.

Biennials do not generally flower the first year, and are in perfection only one year.

Perennials continue to flower several years in succession. Many of them bloom the first year if sown early.

Nothing has been more improved in the past few years than the Antirrhinum and they are now very popular and fashionable. Sown in spring they bloom from midsummer until frost. They succeed best in light soil in a sunny position. They are hardy perennials, but can be treated as annuals.

THE NOVEL DUPLEX OR SEMI-DOUBLE SWEET PEAS

DUPLEX CRIMSON KING SPENCER—Duplex Crimson-King is a double-standard "King Edward Spencer." This is the bright and glorious red in the double form. Is of the largest Spencer type and is sunproof, holding its color perfectly in the hottest sun. In percentage of double standards it is remarkable. It is unusual to find a single stem but what has at least one double blossom, if not two, and frequently three. One cannot adequately describe the beauty of a bunch of these beautiful double Sweet Peas. Price, 15 cents per packet.

DUPLEX SPENCER—In color both the standard and wings are a rich cream-pink, and practically all the plants give flowers with twin or triple standards. On the sprays of four blooms each (of which there is a great number) the two lower flowers are double, while sometimes three of the flowers are double. The three-bloom sprays give the one or two lower flowers with twin or triple standards. The most exquisitely delicate Sweet Pea we have ever offered. Price, 15 cents per packet.

DUPLEX MARY GARDEN

The color is buff, very light, soft, and delicate, with a tendency to turn a trifle deeper with age, especially at the margin. Quite distinct from any varieties previously existing. Its chief novelty, however, lies in the fact that it belongs to the new "Duplex" type. While many of the large flowers come with only a single standard—and these are of the very finest Spencer type—yet fully fifty per cent of the blooms are "double," these being usually the two lower flowers on the stem. Price, 15c per packet.

BLUE AND PURPLE

BURPEE'S BRILLIANT-BLUE—Very large, of richest dark navy-blue color; the tips of the wings showing a bright gentian-blue tint.

MRS. F. J. DOLANSKY—This early-flowering variety is of strong vigorous growth. Flowers of a bright pure pink.

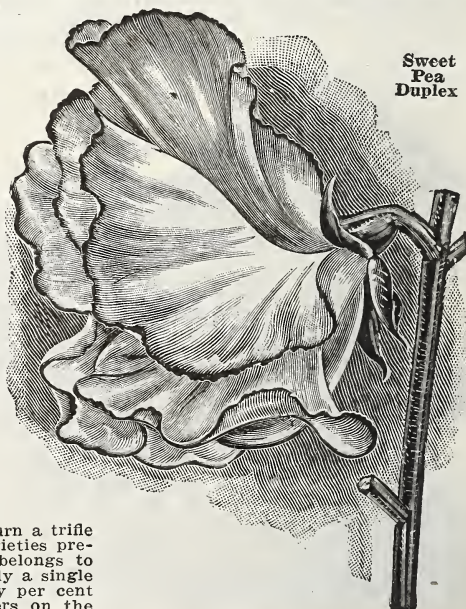

ROSE DU BARRI—An entirely new shade in Sweet Peas. The color is a lovely combination of deep, rich carmine-rose and orange. Unique and wonderful.

STRIPED AND VARIEGATED

AURORA—Extra large flowers; creamy-white, flaked with orange-salmon.

JESSIE CUTHBERTSON—Creamy white, boldly striped and flaked with rich dark rose.

GLADYS FRENCH—Dainty variety, the color being white, delicately penciled and marbled light blue.

NEW ORCHID-FLOWERED SWEET PEAS

This new type of Sweet Pea is quite distinct from the old standard sorts. The flowers are enormous in size, usually over two inches across, with elaborately fluted wings and standard, and very delicately tinted. Bearing four of these immense blooms to a stem which is long and strong, they are truly all that could be desired in Sweet Peas.

TRUE "SPENCER" SWEET PEAS

KING EDWARD SPENCER—Superb rich carmine-scarlet; gigantic.
ASTA OHN—Soft lovely lavender; charming.

Spencer or Orchid-Flowered Sweet Pea

SPLENDID NEW "SPENCER" SWEET PEAS

Price, 12 cents per packet; 45 cents per ounce.

DAINTY SPENCER—This exquisite novelty is a most beautiful pink-edged variety; the ground color is pure white with a very distinct margin of rose-pink. The general effect is light and dainty.
MARGARET MADISON—A most unique and distinct novelty that is absolutely new. It is the most delicate and definite light sky-blue in existence and a color long sought for in sweet peas. Flowers are borne most profusely.
AMERICA SPENCER—A noble flower. The ground color is ivory-white, distinctly striped with bright crimson-red. Several flowers to a stem which are beautifully waved.
FLORENCE NIGHTINGALE—The color is of a most charmingly soft, clear rich lavender, which is enlivened by a very faint sheen of rose-pink. The large well-spread wings are of the same coloring, frilled and well waved. It is practically a self-color and bunches beautifully, attracting universal admiration.

STRAWBERRIES—The Best Fruit That Grows

All varieties offered in this list have perfect or bi-sexual blossoms, except those marked (P), which are destitute of stamens and are termed pistillate or imperfect flowering varieties and must be planted near some perfect-flowering sort or they will produce little or no fruit. We advise fall planting for the best results. Dip the roots of the plants in water as soon as received, and bury the roots in moist, shady ground till you are ready to set them out. Do not wet the tops or you will rot the plants. Neglect for an hour or so is often fatal.
